TREE & SHRUB PROGRAM

SIX ROUNDS

- **ROUND ONE** – Late February and March

Deep Root Fertilization – Injection of fertilizer down to the root zone of trees/shrubs where it is most beneficial.

- **ROUND TWO** – April and May

Bore Treatment – Early stage control of insect development. Prevents damaging insects in soil from reaching the shrub and tree trunks where they can do the most harm.

- **ROUND THREE** – May and June

Insect/Mite Spray – Over top spraying of shrubs/trees helps control chewing/sucking insects from damaging leaves.

- **ROUND FOUR** – July and August

Insect/Mite Spray – Over top spraying of shrubs/trees helps control chewing/sucking insects from damaging leaves.

- **ROUND FIVE** – August and September

Insect Spray/Webworm Control – Over top spraying of shrubs and trees helps control chewing/sucking insects from damaging leaves.

- **ROUND SIX** – October and November

Deep Root Fertilization – Injection of fertilizer down to the root zone of trees/shrubs where it is most beneficial.
